

UX UI Developer – Web Development

Based in: London
Reports to: Head of Web/Mobile Development
Company Profile: genesis is a software house operating in the Financial Services Industry which with its disruptive and innovative technology, positions itself today as a highly successful FinTech scale up.

Products and Technology platform

Genesis has numerous products aimed for the Financial Services Industry which are all based upon the innovative genesis microservices backend framework and leveraging the equally innovative genesis web framework. Besides building web components for the genesis products, the team is heavily involved in building web-based Productivity Tools which are heavily tied to the genesis backend framework and are key to the future roadmaps for the company.

We have invested in our industry focused framework which uses a variety of open source and commercial technologies to allow us to rapidly provide capital market solutions based on the microservices architecture.
